Question 39: Inter-Branch Transfer Reconciliation

AIM

To write a program to read N transfer IDs with outgoing and incoming amounts. For each ID, print MATCH when the two amounts are equal, otherwise print the signed difference. At the end, count matched and mismatched transfers.

ALGORITHM

1. Start the program.
2. Declare variables to store the number of transactions, transaction ID, outgoing amount, incoming amount, difference, and matched and mismatched counts.
3. Get the number of transactions N from the user.
4. Initialize the loop counter I to 1.
5. Repeat the following steps until $I > N$:

- Get the Transaction ID (TID).
- Get the outgoing amount.
- Get the incoming amount.
- Compare the outgoing and incoming amounts.
- If both amounts are equal, display the TID as MATCHED and increment the matched count (MC).
- Otherwise, calculate the difference as `INCOMING - OUTGOING`, display the TID and difference, and increment the mismatched count (MMC).
- Increment the loop counter I by 1.

6. Display the total number of matched transactions.
7. Display the total number of mismatched transactions.
8. Stop the program.

PROGRAM

```
IDENTIFICATION DIVISION.
PROGRAM-ID. INTER-BRANCH-TRANSFER.
DATA DIVISION.
    WORKING-STORAGE SECTION.
        01 N PIC 9(1).
        01 I PIC 9(1).
        01 TID PIC X(5).
        01 OUTGOING PIC 9(12).
        01 INCOMING PIC 9(12).
        01 DIFF PIC S9(4).
        01 MC PIC 9(1).
        01 MMC PIC 9(1).
PROCEDURE DIVISION.
    DISPLAY "ENTER YOUR NUMBER :"
    ACCEPT N
    PERFORM VARYING I FROM 1 BY 1
    UNTIL I>N
```

```
    DISPLAY "ENTER TID :"
    ACCEPT TID
    DISPLAY "ENTER OUTGOING :"
    ACCEPT OUTGOING
    DISPLAY "ENTER INCOMING :"
    ACCEPT INCOMING

    IF OUTGOING = INCOMING
        DISPLAY FUNCTION TRIM(TID) " MATCHED"
        ADD 1 TO MC
    ELSE
        COMPUTE DIFF = INCOMING - OUTGOING
        DISPLAY FUNCTION TRIM(TID) " DIFFERENCE :" FUNCTION TRIM(DIFF)
        ADD 1 TO MMC
    END-IF
    END-PERFORM

    DISPLAY "MATCHED :" FUNCTION TRIM(MC)
    DISPLAY "MISMATCHED :" FUNCTION TRIM(MMC)

STOP RUN.
```

OUTPUT

X01 MATCH
X02 Difference: -50
Matched: 1
Mismatched: 1
